ONLINE SHOP PROJECT DOCMENTATION

- ## SUMMARY

This is a web application which uses API to fetch data and render it into JSON. This data is then used to display contents on a website using JS, Node.js and HTML. The data consists of products of everyday use to humans.

- ## IMPLEMENTATION
  o Built on HEROKU CLI
  o Used WEB322 Assignment templelate which was developed by Jatin Arora.
  o Used Aid Management App Project from OOP244 which was developed by Jatin Arora.

- ## PORTING

Future porting to an Android App.
